Front-end developer (React)

Luggage Care

At Luggage Care, I have been responsible for the front-end of the goluggo.com platform. GoLuggo is part of Luggage Care and is a small startup, which tries to eliminate the pain of carrying around luggage when you are travelling. Your luggage is being checked in at your door and will be delivered at your destination: no need to carry heavy bags around while travelling.

In the last few months, I have been working mostly on the goluggo.com platform. The most important feature of this platform, is the booking flow: customers can make a reservation here. The platform is built with React, Redux Saga, Styled Components and MaterialUI. Together with the development team of Luggage Care, we have been working according to the SCRUM methodology.

Technologies used: React, Redux Saga, Styled Components, Material-UI, Git

Front-end developer (React)

Incentro

During my time at Incentro I have worked on several projects as a front-end developer.

Exoplanet-talks.org

The scientists of the University of Leiden wanted to have a platform to upload videos/lectures about new findings within their research field. I helped building the front-end with React and TypeScript. The content is from Strapi, an open-source Node.js CMS.

Technologies used: React (Next.js), TypeScript, Rest, Strapi, Node.js, Git, SCSS

Koningsdagthuis.nl

Because of the Covid-19 pandemic, the national holiday Kingsday was cancelled and the Royal House of the Netherlands wanted to build a platform to host videos on. I was part of the team and responsible for the front-end of the platform. As a highlight of this project, I was personally thanked by King Willem-Alexander himself.

Technologies used: React (Next.js), Git, SCSS

Incentro CV Creator

Employees of Incentro can easily edit their CV with the CV creator 2.0 I have build.

Technologies used: React (Gatsby), Git, SCSS

Velocity demo webshop

For our partner Commercetools, we have build a demo storefront for e-bikes. Together with other junior developers, we worked in sprints to learn how to work agile and to learn Vue.js

Technologies used: Vue.js, Vuex, Git

Internet entrepreneur

Sanvar

As a student I started out with repairing iPhone screens and later also starting a webshop in iPhone parts. Current activities under my company name:

Affiliate/e-commerce websites

Buying and managing profitable affiliates websites, as well as webshops. Currently owner of:

badkamer123.nl - affiliate directory for bathroom supplier
goedekoffer.nl - affiliate content website for luggage and travelling
officekoning.nl - webshop for Microsoft Office licensekeys

My goal for these websites, is building a monthly passive income. All operating activities for these websites are being outsourced by other companies. Always looking to buy new affiliate websites or webshops.

Bouwbedrijf.site

After doing some research, I concluded that many small-mid-sized construction companies in the Netherlands have an outdated website or no website at all. To deliver a quick, responsive, clean website, I have built my own custom theme with Wordpress, PHP and Javascript. Client can easily edit their own pages with drag-n-drop editor and upload new projects with photo's with this software.

Technologies used :WordPress, PHP, JavaScript, CSS

Mafia Go (on-hold)

Together with a friend from the university, we decided to build our own mobile-game. Without any programming experience, we have build Mafia Go in the last two years with Unity, C# and Firebase as back-end. For now we have ceased all work for Mafia Go, as we think we need an investment and a bigger team to develop this game according to our ideas and make this game a success.

Technologies used C#, Unity, Firebase

Certificates

May 2020

Fundamentals + Advanced React Training

React/GraphQL Academy

I have been following an extensive course for React during my time at Incentro. This course was given by Alex Lobera and I have been granted a certificate for the Basic + Fundamentals React training.

Young Professional Academy (YPA)

Incentro

I have completed the "Young Professional Academy" trajectory. The "YPA" is a mini-traineeship for a month, in which you get prepared to be an IT consultant through soft- and hard skills trainings. During the YPA, I have completed the Javascript track

Education
