Front-end developer

Incentro

During my time at Incentro I have worked on several projects as a front-end developer.

Exoplanet-talks.org

The scientists of the University of Leiden wanted to have a platform to upload videos/lectures about new findings within their research field. I helped building the front-end with React and TypeScript. The content is from Strapi, an open-source Node.js CMS.

Technologies used: React (Next.js), TypeScript, Rest, Strapi, Node.js, Git, SCSS

Koningsdagthuis.nl

Because of the Covid-19 pandemic, the national holiday Kingsday was cancelled and the Royal House of the Netherlands wanted to build a platform to host videos on. I was part of the team and responsible for the front-end of the platform. As a highlight of this project, I was personally thanked by King Willem-Alexander himself.

Technologies used: React (Next.js), Git, SCSS

Incentro CV Creator

Employees of Incentro can easily edit their CV with the CV creator 2.0 I have build.

Technologies used: React (Gatsby), Git, SCSS

Velocity demo webshop

For our partner Commercetools, we have build a demo storefront for e-bikes. Together with other junior developers, we worked in sprints to learn how to work agile and to learn Vue.js

Technologies used: Vue.js, Vuex, Git

Internet entrepreneur

Sanvar

As a student I started out with repairing iPhone screens and later also starting a webshop in iPhone parts. Current activities under my company name:

Affiliate/e-commerce websites

Buying and managing profitable affiliates websites, as well as webshops. Currently owner of:

Lorem ipsum

badkamer123.nl - affiliate directory for bathroom supplier
goedekoffer.nl - affiliate content website for luggage and travelling
officekoning.nl - webshop for selling Microsoft Office license keys

My goal for these websites, is building a monthly passive income. All operating activities for these websites are being outsourced by other companies. Always looking to buy new affiliate websites or webshops.

Bouwbedrijf.site

After doing some research, I concluded that many small-midsized construction companies in the Netherlands have an outdated website or no website at all. To deliver a quick, responsive, clean website, I have built my own custom theme with Wordpress, PHP and Javascript. Client can easily edit their own pages with drag-n-drop editor and upload new projects with photo's with this software.

Mafia Go (on-hold)

Together with a friend from the university, we decided to build our own mobile-game. Without any programming experience, we have build Mafia Go in the last two years with Unity, C# and Firebase as back-end. For now we have ceased all work for Mafia Go, as we think we need an investment and a bigger team to develop this game according to our ideas and make this game a success.

Certificates

May 2020

Fundamentals + Advanced React Training

React/GraphQL Academy

I have been following an extensive course for React during my time at Incentro. This course was given by Alex Lobera and I have been granted a certificate for the Basic + Fundamentals React training.

Young Professional Academy (YPA)

Incentro

I have completed the "Young Professional Academy" trajectory. The "YPA" is a mini-traineeship for a month, in which you get prepared to be an IT consultant through soft- and hard skills trainings. During the YPA, I have completed the Javascript track with success.
